Strategy

Growth strategy that focuses on integrated IT Services which creates a value to our customers through developing new profitable products & services that are in demand by our current & potential customers

Strategic Solutions & Services

Our team is highly skilled engineers specialized in supporting organizations with the following services

- Veeam - Microsoft Office 365 - Microsoft Azure - SOPHOS - Outsourcing Offshoring IT services - Our Solutions.

The Cloud For Modern Business

Microsoft Azure is an ever-expanding set of cloud services to help your organization meet your business challenges. It's the freedom to build, manage, and deploy applications on a massive, global network using your favorite tools and frameworks.

Why Azure is the right choice :

Productive :

- Reduce time to market, by delivering features faster with over 100 end-to-end services.

Hybrid :

- Develop and deploy where you want, with the only consistent hybrid cloud on the market. Extend Azure on-premises with Azure Stack.

Intelligent :

- Create intelligent apps using powerful data and artificial intelligence services.

Trusted :

- Join startups, governments, and 90 percent of Fortune 500 businesses who run on the Microsoft Cloud today.

Azure vs. AWS

Azure is the right choice :

- Organizations all over the world recognize Azure over AWS as the most trusted cloud .

When you compare AWS versus Azure, you'll find that Azure has more comprehensive compliance coverage with more than 70 compliance offerings, and was the first major cloud provider to contractually commit to the requirements of the General Data Protection Regulation (GDPR). To protect your organization, Azure embeds security, privacy, and compliance into its development methodology, and has been recognized as the most trusted cloud for U.S. government institutions, earning a FedRAMP High authorization that covers 38 Azure services. In addition, Azure IP Advantage provides best-in-industry intellectual property protection, so you can focus on innovation, instead of worrying about baseless lawsuits.

More regions than any other cloud provider .

Achieve global scale with 54 announced Azure regions more than any other cloud provider. Our priority on geographic expansion means you can choose the datacenter and region that's right for you and your customers, with the performance and support you need, where you need it.

Build faster with the leading cloud platform .

Rely on the only cloud provider recognized in the industry as having leading solutions in infrastructure as a service (IaaS), software as a service (SaaS), and platform as a service (PaaS)—in fact, according to this Forrester Total Economic Impact study, you'll be more productive and increase your ROI with Azure PaaS services. Turn your ideas into solutions faster with more than 100 services, end-to-end management experiences, and app delivery with agile development .

Use any development tool or language .

Develop and build the way you want in Azure, with your choice of tools, applications, and frameworks, like Jenkins and Chef. As a leading open source contributor on GitHub, Microsoft actively supports multiple open source community projects-such as Kubernetes, fluentd, and Helm-and has a unique partnership with Red Hat to offer coordinated, multi-lingual support across multiple products.

Innovate with unmatched intelligence

Build intelligent solutions at scale using cognitive APIs, bots, machine learning, and blockchain as a service (BaaS) capabilities that you'll only find with Azure. By pairing these capabilities with powerful GPU-based compute, you'll accelerate deep learning, enable high-performance computing simulations, and conduct real-time data analytics using NVIDIA GPUs in Azure.

Dig into big data with a complete advanced analytics solution .

Bring limitless elastic scale to your applications with Azure Cosmos DB. Then, turn your data into a competitive advantage using business analytics solutions, such as demand forecasting and inventory optimization. Rapidly build, customize, and deploy best practices with solution templates and enable transformative insights on all your data with Azure SQL Data Warehouse.

Easily implement ready-to-use IoT .

Quickly start with the most common Internet of Things (IoT) scenarios, such as remote monitoring and predictive maintenance, using preconfigured solutions in Azure IoT Suite. Get the most comprehensive portfolio of IoT solutions, ranging from device and edge to data and the cloud, with Azure IoT. It's open and customizable by design, and 46 percent of Azure Certified for IoT devices run on Linux, Android, or other open source technologies.

- Manage and optimize cloud spend with a complete cost management solution .

Optimize your cloud resources, manage departmental budgets, and allocate costs with free Azure Cost Management. Drive accountability through cost allocation and chargeback reports. Maximize resource utilization by right-sizing virtual machines and visualizing the cost-benefits of various purchasing options that Azure offers.

Take your Azure investments further with the Microsoft Cloud :

Get even more value out of your investment in Azure by using one of our industry-leading SaaS services, including Office 365, Dynamics 365, and Enterprise Mobility + Security. Azure shares many foundational capabilities with these services, such as identity management through Azure Active Directory and mobile device management through Intune.

Business-Class email

- Communicate from anywhere
- Stay in sync and on schedule
- Keep moving ahead with email and shared calendars you can access from anywhere.

Unified Communication

- Online conferencing, meetings and connecting made easy conferencing, IM, and presence
- Host effective online meetings with multi-party HD video conferencing, real-time note taking, and screen sharing.

File sharing

- Share files simply
- Collaborate on docs from anywhere
- Keep everyone working together, wherever they happen to be.
- Collaborate on documents with teammates, share reports with business partners, and connect with customers.

Public Website

- Attract and engage customers
- Build your brand online
- Drive customers to your business with an eye-catching, customized website you can build fast and update easily.

- Microsoft Lync Online
- Microsoft Project Online

Microsoft SharePoint

- Microsoft SharePoint Installation and Configurations
- Microsoft SharePoint Migration and Upgrade
- Microsoft SharePoint Applications Development
- Microsoft SharePoint Integration with external systems and databases
- Microsoft SharePoint Maintenance and Support Services.

Endpoint Protection:

Sophos Endpoint blocks malware and infections by identifying and preventing the handful of techniques and behaviors used in almost every exploit.

Web Protection:

Advanced Web Protection Made Simple : Get the ultimate in web security, control, and insights.

It's web protection that's effective, affordable, and easy with lightning performance that won't slow users down.

XG Firewall:

Expose Hidden Risks .

Stop Unknown Threats .

Isolate Infected Systems

Secure Email Gateway :

Advanced Protection: Protect your users from the latest identity theft, password and banking scams and other incidents .

Sophos Sandstorm : Sophos Sandstorm extends conventional security to enhance ransomware and targeted-attack protection, visibility, and analysis.

Defense from phishing: With its' layered defense approach, the Sophos Email Appliance provides advanced protection against spam and phishing attacks.

Secure Wi-Fi :

Simple & Secure Wi-Fi : Sophos Wireless is easy to deploy and manage so your wireless networks are up and running in no time. attacks.

Sophos Mobile:

Sophos Mobile is a Unified Endpoint Management (UEM) and security solution that helps businesses spend less time and effort to manage and secure traditional and mobile endpoints. The only UEM solution that integrates natively with a leading next-gen endpoint security platform, Sophos Mobile supports management of Windows 10, macOS, iOS, and Android devices.

Sophos server

- Powerful, Server-Specific Protection .
- Intercept X for Server leverages cutting-edge
- Stop Exploits and Persistent, Real-Time Hacks .
- CryptoGuard Stops Ransomware .
- Discover and Ensure AWS and Azure Workloads are Protected and Co

VEEAM

VEEAM Backup and Replicating

the global leader in intelligent data

Availability solutions that fit your business needs and budget

Enterprise and medium business

VEEAM

Veeam Availability Suite : Enterprise And Medium Business

Veeam® Availability Suite™ combines industry-leading backup, restore and replication capabilities of Veeam Backup & Replication™ with the advanced monitoring, reporting and capacity planning functionality of Veeam ONE™. Veeam Availability Suite delivers Hyper Availability for ALL workloads virtual, physical, and cloud — from a single management console, enabling the recovery of any IT service and related applications and data within seconds and minutes. With support for VMware vSphere and Microsoft Hyper-V, it provides Intelligent Data Management for the Hyper Available Enterprise for any app, any data and any cloud..

Veeam Availability Suite

- Veeam Backup & Replication: Hyper-Availability for ALL workloads - virtual, physical, and cloud.
- Veeam Agent for Microsoft Windows: Hyper-Availability for public cloud and physical workloads
- Veeam Agent for Linux : Hyper-Availability for public cloud and physical workloads.
- Veeam Availability for Nutanix AHV: Hyper-Availability for Nutanix Enterprise Cloud.
- Veeam Availability Orchestrator: Ensure business continuity and disaster recovery compliance.
- Veeam Backup for Microsoft Office 365: Get total access, control and protection of your O365 data.
- Veeam ONE for VMware vSphere and Microsoft Hyper-V: Monitoring, reporting and capacity planning for virtual, physical and cloud-based workloads .
- Veeam Management Pack for System Center: Unleash the power of System Center for vSphere and Hyper-V!
- Veeam Cloud Connect for the Enterprise: Secure, off-site backup and replication — without the need for VPN .

VEEAM

Small Business : Veeam Backup Essentials

-Enterprise-level backup and Hyper-Availability for small business

Save up to %60 or more! Veeam® Backup Essentials™ delivers Hyper

Availability for ALL workloads — virtual, physical, cloud (including VMware vSphere and Microsoft Hyper V) from a single management console. It combines the backup, restore and replication capabilities of Veeam Backup & Replication with the advanced monitoring, reporting and capacity planning functionality of Veeam ONE. Designed for smaller businesses with less than 250 employees and environments no larger than 6 CPU sockets or 50 VMs, Veeam Backup Essentials delivers the exact same, enterprise-level functionality as Veeam Availability Suite, with a savings of up to %60 or more.

- Veeam Agent for Microsoft Windows : Hyper-Availability for public cloud and physical workloads.

- Veeam Agent for Linux : Hyper-Availability for public cloud and physical workloads .

- Veeam Backup for Microsoft Office 365 : Get total access, control and protection of your O365 data.
